Incident account

Employee account | Recorded November 6, 2026

Employee	Alex Morgan
Employer	Cedar Quay Pharmaceutical Research
Work location	San Francisco, California
Incident	November 3, 2026, approximately 10:20 a.m.
Affected area	Left forearm

What happened

I was transferring a cleaning solution in the preparation room when liquid splashed between my glove and sleeve onto my left forearm. I rinsed the area at the safety station and told my supervisor, Jordan Lee, that morning. I do not know the product concentration; the employer has the container and safety data sheet.

Care and paperwork

I went to Harbor Lantern Urgent Care on November 3. I gave the clinic my personal health-insurance card because I did not have the employer's claims administrator information. I later received a health-plan notice asking for work-related injury information. My employer acknowledged my incident report but has not supplied a claim number or administrator contact.

What I need help with

Please identify the correct employer claim process, obtain the missing administrator and claim details, and clarify the health plan's pending review. I want to understand who is responsible for the November 3 charges. I have not paid the $1,260 shown on the notice, received a coverage decision, or signed a settlement.
